To whom it may concern, Please reject the NAB's petition 04-160. I pay for XM Satellite radio since FM and AM radio stations fail to provide me with the depth and breadth of programming that I receive from XM. I, and others like me, have finally been given the right to listen to what we want to hear, instead of what the media moguls think their advertisers want to hear. In particular, the recently added local traffic and weather stations have been invaluable in more morning commute from Manhattan to Connecticut. Thank you for making the right decision.

Sincerely,

Quinn Kilbury
